

## We catalyze the economic stakeholders in order to solve social and environmental challenges

✖ Social Nest Foundation is a global platform that connects, inspires and educates entrepreneurs, investors, governments, and corporates, providing them with needed resources, opportunities and tailored guidance so they can create solutions to the world's most pressing challenges.

✖ Founded in 2010 as a pioneering entity in the field of impact in Spain, its vision is to form a global community of people and organizations united in building a better future for all through actions that seek to have a high social and environmental impact.

## How do we do it

Social Nest Foundation carries out its mission by working in three strategic areas:

### Startup Support

It supports startups which are using businesses to create positive social and environmental impact.

### Corporate Programs

We join forces with companies who aim to create a positive impact on the world through open innovation.

### Investors Platform

It inspires, educates and connects asset owners and asset managers to mobilize capital towards sustainability and impact, especially in Europe and LATAM.

At the same time, Social Nest Foundation promotes diversity and inclusion in each of the programs that it leads, as well as building a vibrant community of impact makers across all strategic areas.
